

## DNA SEXING

sex as determined by DNA sexing

**Sample submitted by: Maranatha Aviaries**

**Owner: C Dammasch**

**Animal: CDMA 90 Green Pineapple**

**Species: Green Cheek Conure**

**Gender: Male**

**Sample ID: 69700**

**Analysed: 6/9/2022**

### Transfer request

(for use when selling the animal)

I guarantee that I have sold the bird described on this certificate to

Name :

Address:

City:

State:

Postcode:

I further guarantee that the bird I sold is the same as described on this certificate

Signed:

Date:

If the new owner wishes to obtain a new certificate, this document must be returned to Curtin University so that the new owner can be recorded and a new certificate issued. There will be a \$10.00 recording and processing fee for this service.

The DNA test performed has an accuracy of approximately 99% but this depends upon the sample and information supplied by the owner. In the event that Curtin University returns a verifiable erroneous result for a particular sample. Curtin University will reimburse the submitter only the amount paid to Curtin University to perform the test. In no event shall Curtin University be liable for incidental, consequential, special or other damages of any nature, even if Curtin University has been advised of the possibility of such damage.
